

1 MAY 2025

LET'S DEMILITARISE!

We are working class, NOT cannon fodder!

**For a united working class,
internationalist and in peace!**

www.mocvalencia.info

On this May Day, as we take to the streets to defend our rights, we also raise our voices against a scourge that continues to affect us: the militarisation of our lives and the use of the working class as cannon fodder in the conflicts of the powerful.

Governments call it 'patriotism' to die for interests that are not our own. We workers have no homeland when the profits of our blood are distributed in the bank accounts of a few.

They want us in the barracks, they want us in their wars, they talk to us about 'security' while they impose on us the fear of an enemy that must be defeated.

The enemy is not beyond the borders: it is in the offices of the companies and corporations that profit from war.

While our 'most progressive government in history' is bowing to militarist-capitalist interests by spending billions on weapons, there are still children studying in barracks or in schools that are falling apart, hospitals cannot cope and entire families sleep in a room and eat thanks to the solidarity of civil society.

We don't need tanks,
we want work and a dignified life.
